Cortex XDR tiers

	Cortex XDR Prevent Stop attacks with best-in-class endpoint protection	**Cortex XDR Pro** Unify cutting-edge prevention, detection, investigation, and response in one platform
Data sources	Endpoint	Endpoint, network, cloud & third-party products
Endpoint protection Stop malware, exploits, and fileless attacks with AI-driven analytics and industry-leading behavioral protection.	✓	✓
Device control Prevent data loss and malware delivery with granular USB access control.	✓	✓
Unified incident engine Deliver up to a 50x alert reduction by using advanced analytics to intelligently group related alerts into incidents.	Endpoint alerts	All alert sources
Automated investigation Cut investigation time by 8x with patented alert stitching and automated root cause analysis.		✓
Rule-based analytics Detect threats with a rich behavioral-based BIOC feed from Palo Alto Networks or create your own custom rules.		✓
Behavioral analytics Detect the most sophisticated attacks with a patented ML-based behavioral analytics engine.		✓
Integrated response Contain attacks across your enterprise with flexible, direct actions.	Endpoint only	Endpoint & network
Threat intelligence feed Enrich investigations with context from AutoFocus directly embedded in the unified incident engine.	Optional	Optional
Retention	30 days alert retention	30 days XDR (endpoint & network) data retention
Extended data retention	Optional	Optional
